He's probably looking for someone to blame for something he did. nmap does not replace files on ANY machine. Its only a scanner.

Subject: NMAP – 3.50 changes mstask.exe?

Not sure if this is the best list for this, but I am in a bit of a jam.

I just downloaded the new NMAP v. 3.50 and ran it on my internal network. My IT manager is freaking out. He says my scan replaced mstask.exe on the machines I scanned.

Anybody else seen this behavior?
