Hello,

Maybe ITR can help you,

You can download it from:

[http://www.imperva.com/application\\_defense\\_center/tools.asp](http://www.imperva.com/application_defense_center/tools.asp)

On 2/23/06, Mario Sanchez <[msanchez@xxxxxxxxxxxxxxxxxxxx](mailto:msanchez@xxxxxxxxxxxxxxxxxxxx)> wrote:

Hi,

I wonder if you know any tool similar to Paros Proxy but for TCP/UDP.

I'm looking for a proxy for IP traffic, where I can easily do man in the middle attacks just changing what I want and leaving the rest.

Tools like scapy are ok but you need to spend too much time gathering from sniffer, simulating a full communication, etc... I spend some time trying to make scapy as proxy and it or me failed.

I found a proxy for TCP (I don't remember the name) but it didn't do UDP that is what I need.

Thanks,

Mario
