Thanks to all of you for all the great response re/ the training!
Think I'm going for it... and am looking at the other suggestions, as well.

Thanks again!

Michelle

Subject: RE: Mile2 Training (Certifications)

I have taken their Advanced pen testing and forensics class and have really enjoyed them. A few people in my advanced class had just done the CEH class and said it was great. As with any training provider it usually comes down to the instructor. For the advanced we had Jack Koizol who was a great instructor. Might be beneficial to contact InfoSec and have them give you some names of people who have taken the class and get their input
