If it is Risk Assessment you are doing then CORBA (www.corba.org) might be what you are looking for. If vulnerability then what do you want to scan.

Network: Retina, ISS Internet Scanner, SARA etc
Web server: N-Stealth, Retina, ISS Internet Scanner
Database: ISS Database scanner (highly recommended)

The list goes on.

The last time I looked, nessus was a *vulnerability* assessment tool, not a *risk* assessment tool.
