Well as far as I know, once you visit windows update, it will only have you install patches that you don't have installed. So I assume once installing SP3 and doing Windows Update, you should have everything.

Subject: Re: MS Service Packs

From my experience Once you' ve installed SP3 you have to run windows update so that you can get all the patches starting from when SP3 was released.

Evaluating SSL VPNs' Consider NEOTERIS, chosen as leader by top analysts!  
The Gartner Group just put Neoteris in the top of its Magic Quadrant,  
while InStat has confirmed Neoteris as the leader in marketshare.

Find out why, and see how you can get plug-n-play secure remote access in  
about an hour, with no client, server changes, or ongoing maintenance.
