I have noticed the following port scans lately on my network

08/11/2003 05:14:22.112 – Possible Port Scan – Source:24.52.108.213, 1745, WAN – Destination:255.255.255.255, 7782, LAN – UDP scanned port list, 8777, 8777, 7778, 7779, 7780 –

08/11/2003 05:14:22.128 – Probable Port Scan – Source:24.52.108.213, 1745, WAN – Destination:255.255.255.255, 7787, LAN – UDP scanned port list, 8777, 8777, 7778, 7779, 7780, 7781, 7782, 7783, 7784, 7785 –

I did a little digging with google, and it appears that these ports are used by Unreal Tournament servers. So, after seeing this, I relaxed a little thinking that someone had just gotten a new game. This morning, I checked my email, and I have a significant amount of these messages, coming into different branch offices (we use cable/dsl for internet access) so it can't just be one person with a new pc.

Anyone else seeing this?
