you may also want to check out SpyBot/Search & Destroy at  
<http://www.safer-networking.org/>

it's freeware, effective, nicely developed, updated consistently, easy to use, and was recommended on this mailing list as well.

Subject: Ad-aware

I have been tasked with identifying suitable anti-trojan-ware for workstations. Ive been looking at AdAware. Its free and seems to do the job. Im wondering what is the catch.?

Has anyone done a review of antitrojan software? Id like to know if there is a suitable/cheap/supported product that we can use to compliment sophos that will protect against malicious code, trojans, session hijacking and other web nasties.

Thanks

Jack
