I don't have the information of my eventviewer but I do remember that everything start with the follow problem

"the information store Stop responding, and the CPU usage level remains at 100 percent" and I them read and aply all the steps describe in Microsft Knowledge Base Article 31384, and still I can not read my mail.

Ricardo

Those limits should not stop the service from starting. What error messages show up in the eventviewer when you try to start it?

Pri.edb 3.56 GB

Pub.edb 909 MB

SecurityFocus BASICS: RE: help with exchange

If those size reach this limit it's possible to divided this File ?

Thanks

How big are the files? Exchange 5.5 has a size limit on those files; if they reach that limit the services will not start.
