Thanks..Will try this out, seems like I missed it and will try out PLA/FWANALOG for PIX log gathering.

Best Regards

Read the README document in the Nipper file. It explains how to audit the PIX. I included in the email for your reference.

--pix | --asa | --fwsn

Treat input configuration as a PIX/ASA/FWSM-based Cisco firewall.

--ios | --ios-router

Treat input configuration as an IOS-based Cisco router. This is the default device type.

Subject: Auditing Router and Firewall – Checklist and Utils

Hi All,

There is a need to undertake Auditing of Routers (Cisco) and Firewall (PIX 515)

I have read about Nipper in case of Auditing Router, but haven't come across any equivalent utility for Cisco PIX. How can I audit Firewall?

Is there a defined checklist..tool etc?

RE: Auditing Router and Firewall – Checklist and Utils

Which is the best open source product you guys use for Router and Firewall logging? Something capable of generating management reports?

Pls advise!!
