Hey Everyone, happy holiday in advance for tomorrow to those in the US. I'm looking for a tool similar to Copernic, but could search all the different engines and other places such as MIRC, eBay, newsgroups, etc.

An example of what I want would be :

I'm trying to dig around for anyone who may have pirated our software or our exams and posting it on websites, or sharing the exam secrets on newsgroups etc...

I need the tool to also detect duplicate URLs when it searches.

Anyone have any ideas ?
