To me as an end consumer of security products I do not really give a hoot whether the original bug is released for self-gratification, spite, or \$\$\$.  
Motive be damned, I care that I am made aware of a vulnerability and can find the resources to close it. :)

RFP and others in here end up helping me keep my systems secure. I do not care about the "why", I am just thankful that Vuln-dev, Bugtraq, et al are around.

\*I love you guys (and grrlz)\*. I mean, ummm, how bout those new G5 specs.  
;)

My USD 0.02,

-Joe G.
