>> *you're an idiot.*

>

> *Technically, they are different packages. Different GUI, different*

> *image file layout.*

BWAHAHAHAHAHHAHHAHHAHAA! You are truly pathetic. Absolutely pathetic. You invoke Symantec and PowerQuest when it suits you then you deny them when it doesn't. You're a fucking nutcase. A total, 100% certifiable fi0otcake.

>> *BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA! *PMSL* The OS, you*

lala la lala lala....

OP: "... a new larger disk."

The import of those few words are completely lost on you, aren't they,
Dustard?

> *The drive restoration program is going to let windows access the full*

> *capacity, as it resize s the partition information by default. Windows*

> *will trash the guys data if he isn't running 48bit LBA mode.*

BWAHAHAHAHAHAHAHAHAHAHAHA!

>> *No, Dustbin. I didn't. <SNORT> You fucking gormless techno-idiot.*

>> *You got any supporting evidence for your completely insane claim*

>> *that "he will need to enable 48bit lba, or he WILL trash the new*

>> *drives data when windows writes past the 120gig mark"? Hmmm? You*

>

> *Now, as I said*

Who gives a fuck what you said? Without fail, whatever it was you said is not in keeping with the facts, which you just quoted, for fucks snakes, and you still can't get it right. Your quoted text there from the KB has already been dealt with in another post and it has been summarily disposed of on the grounds that:

OP: "... a new larger disk."

The import of those few words are completely lost on you, aren't they,
Dustard?

Re: Problem with disk upgrade of Windows XP Pro

There is no risk of data loss in the situation as described by the OP. Do you understand that, monkeyboy? No risk of data loss. None whatsoever. Do I now need to tell you why it is so, shit for brains?

> *Regards,*
