Hi all,

I'm conducting an international study on individuals' attitudes towards how computers should be used at work and views on how responsible employers should be when it comes to protecting our computers from spyware and viruses. I still need about 450 individuals to complete the survey.

I would really appreciate it if people could complete the survey, found here:

<http://weblab.org.uk/cgi-bin/surfcontrol/page1e.pl>

Moreover, I thought it would be interesting for the list and for me to post your views on this on the list. Do you believe that workplaces need to change/write policies on computer usage? (Note: I won't be using what you write here in my research — only the responses to the survey).

Kind Regards,

Dr. Monica Whitty

.
