So they cannot search the directory: no x permission on a dir means it isn't even searchable.

>> *Group B have read and execute permissions to same directory.*

Fine. They cannot write files there, but search and read/execute the files therein.

>> *and*

>> *Group C have only read permissions to same directory.*

```
walter]$ ll -d test
dr--r--r-- 2 walter users 4096 Mär 4 07:36 test/
[walter@woodpecker walter]$ cd test
bash: cd: test: Permission denied
```
