Did you ask them why your machine crashed 190 times?

What answer did they give?

>I found that they listened when I didn't swear at them or belittle
>them.

Who did? I was one of the first users of ZA and I recommended it to far more people than would ever listen to you for advice.

>Hence I'm not pissed off. And again I got my problem solved.

What problem was it?

- 1) Startup problem.
- 2) Crashing problem.
- 3) Mysterious ".tmp" files problem.
- 3) Uninstall problem.

If it wasn't one or more of those then you did not have the kind of problem that many of us here have experienced – and for which ZLabs never provided a solution.

>Try it sometime...

Look smartass, your machine did not crash 190 times from that piece of crap.

Learn to hold your tongue until after you have walked in someone's
mocassins.
