Here's a great program to clean up any leftover registry entries. It's not the
regular Registry Cleaner but a better one.

Apparently ZA doesn't like to go backwards and sometimes exhibits problems with
forward installs. You could uninstall the trial or whatever you have on there
now, then use this to remove all Zone Labs entries in the registry and then
reinstall either one.

<http://www.jv16.org/> Registry cleaner

Hope this helps.

David
