Jason, Jason, you're missing the point and my original question:

> *Why did you suddenly put your credentials on here?*

That's all. Personally, I have both of them myself, they may be "easy" tests (at the time, for some people, they're not). That doesn't matter. What does matter is that you're forthcoming enough to ask for help without throwing alphabet soup out. I think you have every right to have your questions answered. My criticism simply focuses around the fact that you added your letters during a response back to Wailakig. He's the closest thing to a subject matter expert on here, trust me.

> *And for the record I don't like Porsche and no woman has ever called me short.*

Never said you did. Simply was using it as an analogy. Sorry if I touched on a "sensitive" subject....

> *Now, you obviously have nothing better to do so grab your spankercheif and go back to visiting your favorite websites.*

No need! Those days are gone. I have enough pornography in my real life; but, thanks anyways!

> *Let's all thank Slade for his psychological overview of my insecurities.*

Does that mean I was right? Hmmm.....
