In a post a chappy called Howard Schulz suggested that telling Kerio
> *to use a proxy (even if one did not exist) would assist with certain*
> *blocking problems (in particular with getright). Unfortunately this*
> *lowered the security of Kerio.*
> *He also mentioned that there was a pseudo gateway/proxy which could be*
> *used to the same effect but without affecting the security.*
>
> *I have tried posting for Howards attention twice now – no reply*
> *I have tried a google search and came up with over a dozen posts –*
> *none of which were relevant.*
> *I have posted the question as part of another thread.*

It has now been suggested that I try this group

>
> *I know I am going to get the usual nerds and sad cases with sarcastic*
> *and wasteful replies but could the serious people help with the*
> *number/code/instruction for that pseudo gateway/proxy.*
>
> *Much gratitude*
>
> *Gumpy (NOT Flumpy or whatever he calls himself)*
