Can anyone give me some recommendations for a firewall appliance for a small business of 25 – 50 people? The following are some of the thing i think I need:

- 1 Cost would be less than \$2000
- 2 Firewall protection from the bad guys
- 3 Provide VPN access
- 4 Relatively easy setup and maintenance (predefined rules)
- 5 AntiVirus functionality

I'm looking to replace an old Gauntlet firewall running on BSD. Any help would be much appreciated.

Al
