Spoken like someone who has never tried it. Kazaa Lite (not KMD) is a wonderful source to download just about anything. I have over 5,000 perfect MP3's and hundreds of software titles thanks to this network. Where else can one find over 3,000,000 users online sharing over a BILLION files! It has it's share of fakes and viruses just like any other P2P network. Smart users can work around this.
