My vendor is able to offer me almost 50% on one unit as a technology demo.....

We've been using Sonicwalls for the most part, and have dabbled a bit in the Watchguard line. After having some stability issues with both (reboots, lockups, bottlenecks, etc) - I'm currently reevaluating what Firewalls we standardize with.

ALOT of my fellow peers swear by Cisco and Netscreen exclusively !
Just looking for some feedback.
