Trojan Brisv.A !inf is a new trojan that is infected thousands of computers very fast. here are steps to get ride of this trojan

- Download the FixBrisvA.exe file
- Save the file to a convenient location, such as your Windows desktop.
- Close all the running programs.

If you are on a network or if you have a full-time connection to the Internet, disconnect the computer from the network and the Internet.

If you are running Windows Me or XP, turn off System Restore.

- Locate the file that you just downloaded.
- Double-click the FixBrisvA.exe file to start the removal tool.
- Click Start to begin the process, and then allow the tool to run.

NOTE: If you have any problems when you run the tool, or it does not appear to remove the threat, restart the computer in Safe mode and run the tool again.

- Restart the computer.
- Run the removal tool again to ensure that the system is clean.

If you are running Windows Me/XP, then reenable System Restore.

If you are on a network or if you have a full-time connection to the Internet, reconnect the computer to the network or to the Internet connection.

Now Download the FixBrisvA.exe file <http://darfuns.com/trojan-brisv-a-inf-removal/>
