Thanks for the input and congratulations on passing both exams! I have heard they are really hard. What next exam are you going to take? I can see you are already MCIWA and MCIWD. That is impressive!

Would you say that MCIWD is easier track then MCIWA? How long did it take you to become both?

I was wondering if you could give me some of those security links you mentioned, and which books have you used (apart from official ones). I have already bought McGraw-Hill "Firewalls complete", Sybex "Security Complete" and New Readers "Internet Security". I wonder if you have read any of them and what you think about them.

And lastly, since you have passed the Internetworking as well, could I pick your brains on that one as well? Perhaps a few links and book recommendations only.

I wouldn't bug you so much , it's just that I have checked most CIW sites on the net and there is very little (to nothing) on MCIWA track. Any more input is greatly appreciated.

Thanks in advance and keep up the good work!

Gee
