You stated that you messed up your computer with no explanation of the problem. Please advise how my advise screwed up your computer? Since I have no knowledge of your computer skills sometimes an answer can be above an operators comprehension. Sorry! Unless you can define your original question/my answer and show you followed my instructions step by step, I get the impression that communication was not followed step by step. You never came back and relayed that my information didn't apply or correct the problem. I have found that the person I communicated with needs a simpler way to correct the problem. A person
