Changing the 'Flags' value in zone 0[1] to 0x47 causes the 'My Computer' icon to appear on the security tab in the Internet settings dialog. You can then manipulate the settings as for other zones. I've set the running of ActiveX to 'prompt'.

Please tell news. Even deactivating ActiveX there changes nothing about these special ActiveX Controls.

It produces the prompt to allow/disallow running.

I've disabled DCOM using dcomcnfg.

No,

Yes.

you've disabled binding DCOM to network protocols.

And that.

.
