Hi

I have a problem connecting to some specific hosts using openssh client.

I cannot connect from my host (nexc.iasi.rdsnet.ro) to a host that I could connect just a few days ago. The only thing that has changed is that our IP address has changed. This is the output from the ssh client.

```
OpenSSH_2.9p2, SSH protocols 1.5/2.0, OpenSSL 0x0090602f
debug1: Reading configuration data /etc/ssh/ssh_config
debug1: Seeding random number generator
debug1: Rhosts Authentication disabled, originating port will not be
trusted.
debug1: restore_uid
debug1: ssh_connect: getuid 0 geteuid 0 anon 1
debug1: Connecting to server5.storecom.com [195.230.173.145] port 22.
debug1: temporarily_use_uid: 0/0 (e=0)
debug1: restore_uid
debug1: temporarily_use_uid: 0/0 (e=0)
debug1: restore_uid
debug1: Connection established.
debug1: read PEM private key done: type DSA
debug1: read PEM private key done: type RSA
debug1: identity file /root/.ssh/id_rsa type -1
debug1: identity file /root/.ssh/id_dsa type -1
debug1: Remote protocol version 1.99, remote software version
OpenSSH_3.4p1
debug1: match: OpenSSH_3.4p1 pat ^OpenSSH
Enabling compatibility mode for protocol 2.0
debug1: Local version string SSH-2.0-OpenSSH_2.9p2
debug1: SSH2_MSG_KEXINIT sent
Write failed: Connection reset by peer
debug1: Calling cleanup 0x8063570(0x0)
```

comp.security.ssh: I cannot connect to a host, but I can connect to other hosts

this is the corresponding log entry from the host that I'm trying to connect to:

Oct 25 15:24:26 www sshd[15587]: Did not receive identification string from 213.157.176.133

I can connect to other hosts, only this one gives me problems...

Any kind of help or hint is appreciated.

Macarie Neculai.
