Hi,

I'm having problems sending a file from a UNIX box to a windows server.

UNIX box : son19

Windows : 130.x.x.x (home dir is c:\Documents and Settings\

this is the command that I use `scp $HOME/file.pub <user>@130.x.x.x:`

but i keep getting this error :

`<user>@130.x.x.x's password:`

`scp: warning: . (dest): No such file or directory.`

On verbose mode, this is what i get :

`debug: SshTtyFlags/sshttyflags.c:294: Not a tty. (fd = 0)`

`scp:SshFCTransfer/sshfc_transfer.c:1642: Destination file didn't exist.`

`scp:Scp2/scp2.c:795: Received error SSH_FC_ERROR_PERMISSION_DENIED.`

`scp: warning: . (dest): No such file or directory.`

`scp:Scp2/scp2.c:728: Received error SSH_FC_OK, error message .`

`scp:Scp2/scp2.c:931: Transfer ready`

`scp:ssh_pipe_stream_destroy`

`son19:[user]:/abc/abc/home/user/.ssh2 > debug:`

`Ssh2ChannelSession/sshchsession.c:1380: received exit status : 0`

`debug: Ssh2Common/sshcommon.c:678: num_channels now 0`

`debug: Got session close with exit_status=0`

Any ideas?

comp.security.ssh: SCP from UNIX box to Windows server

Thanks!
