Hello! How is everybody???

I'm trying to write to a LogFile and I'm receiving an error security. It says that the security policy does not allow this operation. My web.config and machine.config are the defaults (I haven't changed anything). So the question is what is the I need to changed in this files

The following is the error that I am receiving

**Security Exception**

Description: The application attempted to perform an operation not allowed by the security policy. To grant this application the required permission please contact your system administrator or change the application's trust level in the configuration file.

Exception Details: System.Security.SecurityException:  
Requested registry access is not allowed.

Thank you very much in advance

Marlene A. Roman
