Andrew,

You may try to set the "Replace permissions entries on all child objects..." located on the Security Tab of the "Temporary ASP.NET Files" directory Properties dialog.

Hope this helps,

Patrick Cole

microsoft.public.dotnet.framework.aspnet.security: RE: Bogus file access error by ASP.NET

| Often when developing or running an ASP.NET it gets an
| error when trying to recompile an ASPX file. It appears
| it is trying to delete one of its own temporary files. I
| get the following exception thrown below, which blows off
| my session as well. What is the correct work around for
| this bug.

| A first chance exception of
| type 'System.UnauthorizedAccessException' occurred in
| mscorlib.dll

| Additional information: Access to the
| path "C:\WINDOWS\Microsoft.NET\Framework\v1.0.3705
| \Temporary ASP.NET Files\ishelp\a31bbef8\5fe5187
| \fpetaky3.dll.delete" is denied.

| Thank you,
| Andrew
