**From:** Mike Shaw [MS] ([mikeshaw@online.microsoft.com](mailto:mikeshaw@online.microsoft.com))

**Date:** 10/26/02

From: "Mike Shaw [MS]" <[mikeshaw@online.microsoft.com](mailto:mikeshaw@online.microsoft.com)>

Date: Sat, 26 Oct 2002 22:44:35 +0100

>From MSDN

(<http://msdn.microsoft.com/library/default.asp?url=/library/en-us/dnbda/html/dalgissues.asp>):

"The ASPNET security account cannot create event sources. If you use the SourceExists() method on the EventLog class and the Source exists it will return True, but if the Source does not exist, it throws an exception. This should not cause problems if you install event logs and event sources using the EventLogInstaller class with Windows Installer files or Installutil.exe, because the installation is probably running with the Administrator security account. "

I also wrote the attached a while ago which will help with the registry ACL's you need if you are using the ASPNET account to write to the event log
