I have this code that works perfect on one site but will not work on a new one.

Any Ideas?

Code:

Login.aspx.vb

```
Dim ticket = New FormsAuthenticationTicket(1, UCASE(tbUserName.Text), Now, Now.AddMinutes(20), True, User.DepartmentName.ToString)
```

```
Dim hash As String = FormsAuthentication.Encrypt(ticket)
```

```
Dim cookie As New HttpCookie(FormsAuthentication.FormsCookieName, hash)
```

```
Response.Cookies.Add(cookie)
```

```
Dim returnUrl As String = Request.QueryString("ReturnUrl")
```

```
If returnUrl Is Nothing Then
```

```
returnUrl = "/"
```

```
End If
```

```
Response.Redirect(returnUrl)
```

```
Response.End()
```

web.config:

```
<authorization>
```

```
<allow roles="Sales"/>
```

```
<deny users="*" />
```

microsoft.public.dotnet.framework.aspnet.security: Froms Auth driving me NUTS!!!! HELP Please....

</authorization>
