I'm pretty sure, that this is a permission problem. When you change permission to ASPNET account you have to kill aspnet\_wp.exe, in order for process to reauthenticate with new permissions. Here are some QArticles which could help.

<http://support.microsoft.com/default.aspx?scid=kb:EN-US;q325791>

<http://support.microsoft.com/default.aspx?scid=kb:EN-US;q290398>

<http://support.microsoft.com/default.aspx?scid=kb:en-us:Q257757>

Also searching on [www.google.com](http://www.google.com) (groups) using "ASPNET Excel access denied" keyword could be of some help.
