Hello All,

I am trying to use the .Net built in role based security. It is not working.

The web config has the following;

```
<authorization>
```

```
<deny users="?" />
```

```
<allow roles="DMZ\SLReports, DMZ\Supply-Link" />
```

```
<deny users="*" />
```

Users are not being allowed web access unless I add them to an <allow users> section.

Any ideas?

Thanks
