I have a similar problem i have set up a 1 sql server 1 web server 1 client and cannot pass through my identity

turned on impersonate in webconfig
only NT auth is on for IIS
turned on trust delegation on the www server
sql has the domain users setup on db

dont know whats going on EVERY NEWSGROUP has the same question HOW DOES SOMEONE SET IT UP i have read white paper after white paper even the ones labeled how to configure asp.net applications for a delegation scenerio it still doesnt work logon failed for (null) user.

ANYONE PLEASE HELP its been 7+ hours.
