Hello

This SignOut code is not working, people are still logged in after it redirects to default.aspx. any ideas? Thanks.

```
public class logout : System.Web.UI.Page {
    private void Page_Load(object sender, System.EventArgs e) {
        FormsAuthentication.SignOut();
        Response.Redirect ("default.aspx");
    }
    ....
}
```

This is how I logged users on:

```
FormsAuthenticationTicket authTicket = new
    FormsAuthenticationTicket(
        1, // version
        email.Text, // user name
        DateTime.Now, // creation
        DateTime.Now.AddMinutes(60), // Expiration
        false, // Persistent
        roles.ToString() );
string encryptedTicket = FormsAuthentication.Encrypt(authTicket);
HttpCookie authCookie = new HttpCookie(
    FormsAuthentication.FormsCookieName, encryptedTicket);
Response.Cookies.Add(authCookie);
// Redirect the user to the originally requested page
Response.Redirect( FormsAuthentication.GetRedirectUrl(
    email.Text, false ));
```
