I got the error message below when I try to open a connection with code:

```
Dim connection As New OleDbConnection("Driver={Microsoft Text Driver (*.txt;*.csv)};DBQ=C:\inetpub\aesd")
connection.Open()
```

I am developing an asp.net application on Windows XP SP2. Can anyone help? Personal I think it is because of the limited permissions that asp.net account has.

```
ERROR [HY000] [Microsoft][ODBC Text Driver]General error Unable to open registry key 'Temporary (volatile) Jet DSN for process 0xc8c Thread 0xb44 DBC 0x86ca004 Text'.
