Hi,

for me it works – but I give access to directories – not to files!
One dir like this:

```
<system.web>
<authorization>
<allow roles="Admins" />
<allow roles="BSTR Admins" />
<allow roles="BSTR Members" />
<deny users="?" />
</authorization>
</system.web>
```

And the other like this:

```
<system.web>
<authorization>
<allow roles="Admins" />
<allow roles="BSTR Admins" />
<deny users="*" />
</authorization>
</system.web>
```

If you are an Admin you see both – instead you see only the first!

Even one dir where every role (or better no anonymus) can access pages works like this:

```
<system.web>
<authorization>
<deny users="?" />
</authorization>
</system.web>
```

So last not least my siteMap

```
<siteMapNode url="~/Default.aspx" title="Startseite" description="Zur ISatTrack Startseite">
  <siteMapNode roles="Admins, BSTR Admins" title="Administration"
description="Administrationsbereich">
    <siteMapNode url="~/Admin/Default.aspx" title="Hauptseite" description="sbersicht f r
Administratoren">
      <siteMapNode url="~/Admin/UserMgmt.aspx" title="Benutzer" description="Verwaltung der
Benutzer" />
      <siteMapNode url="~/Admin/PCs.aspx" title="PCs" description="Administration der PCs" />
```

microsoft.public.dotnet.framework.aspnet.security: Re: roleProvider and Windows Authentication

```
</siteMapNode>
</siteMapNode>
<siteMapNode roles="Admins, BSTR Admins, BSTR Members" title="Mitarbeiterbereich"
description="Mitarbeiterbereich">
  <siteMapNode url="~/Members/Default.aspx" title="Hauptseite" description="sbersicht f r
Mitarbeiter">
    <siteMapNode url="~/Members/Software.aspx" title="Software" description="Softwaredownloads" />
  </siteMapNode>
</siteMapNode>
<siteMapNode roles="Users, Admins, BSTR Admins, BSTR Members" title="Benutzerbereich"
description="Bereich Benutzer">
  <siteMapNode url="~/RegistredUsers/Default.aspx" title="Hauptseite" description="sbersicht f r
angemeldete Benutzer">
    <siteMapNode url="~/RegistredUsers/CMRRequest.aspx" title="CMR Abfrage" description="CMRs
abfragen" />
    <siteMapNode url="~/RegistredUsers/ChgPWD.aspx" title="Passwort "ndern" description="Zndern Sie
regelm"áig Ihr Passwort"
/>
  </siteMapNode>
</siteMapNode>
</siteMapNode>
```

The things work like expected for me!

The only "unexpexted" thing was – that for "Bereich Benutzer" I had to add all roles, since roles=""*"" works also for user not in any role – and roles="?" is not supported.

Cheers

Manfred
