Hi,

i'm trying to use function from crypt32.dll in dot net, and get exception:

An unhandled exception of type 'System.TypeLoadException' occurred in WindowsApplication1.exe

Additional information: Could not load type WinApis from assembly WindowsApplication1, Version=1.0.2006.19524, Culture=neutral, PublicKeyToken=null because the method CryptUnprotectData has no RVA.

can anyone shade some light on the subject?

TIA, z.
