I have my own subscription page that prompts for Membership info, among other things. when the user submits a valid page I would like to 1) Membeship.CreateUser and 2) automatically log in the newly created user. Step 1 is simple, but it's not clear to me how to do step 2

Thanks in advance for any suggestions,

Ralph Shillington

for step 2, you can do this to get the user logged in.

```
FormsAuthentication.Authenticate("username", "password");
```
