Password length minimum: 7. Non-alphanumeric characters required.I ve taken this error. Microsoft Security Policy requires something nonsense I think. I never think a password like "75256asdf!^+%&" this. How can I use normal passwords which users demand what their hearth say as a password

it can be configured by a AspNetSqlMembershipProvider entry

```
<membership>
<providers>
<add name="AspNetSqlMembershipProvider"
passwordStrengthRegularExpression=""
minRequiredPasswordLength="X"
minRequiredNonalphanumericCharacters="X"
...

```

Hope it helps
