Hi, All

I have VB 2005, I use login control to logn in, after log in, I go to another page. I want to use the login username in another, how to use session varible to pass the username?

I use the following code, but I cannot login:

```
Protected Sub Login1_Authenticate1(ByVal sender As Object, ByVal e As System.Web.UI.WebControls.AuthenticateEventArgs)
```

```
Session("username") = Login1.UserName
```

```
End Sub
```

Please help

Thanks

Kai
