:

: ASP.NET is not authorized to access the requested resource. Consider
: granting access rights to the resource to the ASP.NET request identity.
: ASP.NET has a base process identity (typically {MACHINE}\ASPNET on IIS 5
: or Network Service on IIS 6) that is used if the application is not
: impersonating. If the application is impersonating via <identity
: impersonate="true"/>, the identity will be the anonymous user (typically
: IUSR_MACHINENAME) or the authenticated request user.

:

: To grant ASP.NET write access to a file, right-click the file in
: Explorer, choose "Properties" and select the Security tab. Click "Add"
: to add the appropriate user or group. Highlight the ASP.NET account, and
: check the boxes for the desired access.
