Hello sir,

I am unable to create a client certificate.
How to go about to create a client certificate.

Sir i have created a web server certificate and installed
in my web server from verisign.

when i am trying to access that page using https:// it
says

HTTP 403.7 – Forbidden: Client certificate required
Internet Information Services.

Is it that the client certificate also i have to get it
from verisign, if so how?

Now i didnt understand how to create a client certificate.

Can any one please help me how to start to create a client
certificate.
