Hello,

We can not recommend third party products.

Here is a link to free anti-virus software ---->

<http://www.google.com/search?hl=en&q=%22free+anitvirus+software%22&btnG=Google+Search>

Whenever, we get a call about a compromised machine we will send the customer to trendmicro free online scan to perform an online scan. It appears that trend micro always has the latest pattern files ---->

<http://housecall.trendmicro.com/>

Thank You.

Diana.

|
| I have been running my dedicated remote webserver without anti-virus
| protection since I leased it 2 years ago. I don't think that it has been
| infected but I don't want to take any more chances.
|
| Can someone please recommend a low cost anti-virus package for W2K Server?
|
| Please advise. Thank you.
|
