1. I have created Virtual Machine under Virtual Server R2 SP1 with Windows 2003 as part of workgroup and installed IIS 6.0
2. I could ping this machine by IP address, and I am able to access shared folder by using IP address on this Virtual Machine
3. I have a problem to access IIS on Virtual Machine from my computer (is part of domain)

My request from HOST browser "http:\XXX.XXX.XXX.XXX" give response as:

ERROR

The requested URL could not be retrieved

---

While trying to retrieve the URL: <http://XXX.XXX.XXX.XXX/index.htm>

The following error was encountered:

Access Denied.

Access control configuration prevents your request from being allowed at this time. Please contact your service provider if you feel this is incorrect.

Any idea about how to fix that?

Thank you

.
