

Using Firewalls and Antivirus at the same time

I am trying to fix my problem of getting my computer hijacked with Spam, virus and other programs and needed some help. As most of you know, I do not like the UI from AVG, but the thing does seem to work.

This is how I have it set up now for what I think will stop any problems, let me now what I left out.

Firewall: Zone Alarm Pro, McAfee Personal Firewall Plus, Norton NIS,

Anti-Ad's: Spybot, Lavasoft Ad-Adware, McAfee Privacy Service,

Virus, AVG 6, Sophos, Norman Antvirus, McAfee Virusscan Pro, Norton Antivirus, IPE antivirus.

Everything runs ok together, its a little slower on startup. What else do I need ? A hardware firewall ? I have looked for hardware firewalls and cannot find them. I use dial up. Might change to xp pro, is that firewall worth it ?

Regards
