Hey Dave

Well I picked up the Linksys BEFSR41 Router (even was on sale !) and got the Westell 2100 modem all connected to our favorite ISP's phone line and....the ready light keeps blinking, saying NO DSL, in calling tech support, they had no record for my phone number be turned on to a DSL account, I referenced the ticket number and they looked it up and said my "other number" has been activated for DSL...Small problem, my "other number" is my Verizon Wireless account. For some reason I think my phone might not work on T1 downloads. Ugh a few more days wait. !

Tedd
