System Restore option in Windows Me/XP

<http://www.augustana.ab.ca/other/cns/virus/>

<http://www.adamtj.org/repository/ho..2.Blaster.Worm/>

Users of Windows Me and Windows XP should temporarily turn off System Restor

e. Windows Me/XP uses this feature, which is enabled by default, to restore

the files on your computer in case they become damaged. If a virus, worm, or

Trojan infects a computer, System Restore may back up the virus, worm, or T

rojan on the computer.

Windows prevents outside programs, including antivirus programs, from modify

ing System Restore. Therefore, antivirus programs or tools cannot remove thr

eats in the System Restore folder. As a result, System Restore has the poten

tial of restoring an infected file onto your computer, even after you have c

leaned the infected files from all the other locations.

Also, a virus scan may detect a threat in the System Restore folder even tho

ugh you have removed the threat.

microsoft.public.security.virus: Re: Trojan Horse?

For instructions on how to turn off System Restore, read your Windows documentation, or one of the following articles:

How to turn off or turn on Windows XP System Restore

=====

Remove Spyfiles by using these 5 programs .

Make sure you use the SpyBot/SpywareBlaster/Ad-aware/Bazooka/Swat It > Online > Update button regularly .

Once you have the program installed , open SpyBot and select the "Immunize"

icon on the left & Click on Immunize , in the new page .

Permanently running bad download blocker for Internet Explorer .

Select > Block all bad pages silently & click Install .

Then c
