Sheila;

Nothing can do what you describe "...it turns my

> *Windows (any version I've installed - currently XP) into*

> *windows NT4.0 service pack 5..."*

Exact what happens that you think it does?

If something odd continues to happen even after a Clean Installation, you probably have problems with viruses, worms, etc because of an unprotected computer.

Start over with a Clean Installation:

<http://www3.telus.net/dandemar/cleanxp.htm>

Be sure to follow this link to help protect your computer:

<http://www3.telus.net/dandemar/security.htm>
