1) Download the following two items...

Trend Sysclean Package

<http://www.trendmicro.com/download/dcs.asp>

Latest Trend signature files.

<http://www.trendmicro.com/download/pattern.asp>

Create a directory.

On drive "C:"

(e.g., "c:\New Folder")

or the desktop

(e.g., "C:\Documents and Settings\lipman\Desktop\New Folder")

Download sysclean.com and place it in that directory.

Download the signature files (pattern files) by obtaining the ZIP file.

Extract the contents of the ZIP file and place the contents in the same directory as sysclean.com.

2) If you are using WinME or WinXP, disable System Restore

<http://vil.nai.com/vil/SystemHelpDocs/DisableSysRestore.htm>

3) Reboot your PC into Safe Mode

4) Using the Trend Sysclean utility, perform a Full Scan of your platform and

clean/delete any infectors found

5) Restart your PC and perform a "final" Full Scan of your platform

6) If you are using WinME or WinXP, Re-enable System Restore and re-apply any System Restore preferences, (e.g. HD space to use suggested 400 ~ 600MB),

7) Reboot your PC.

8) If you are using WinME or WinXP, create a new Restore point

9) Please report back your results

Dave

| My computer was hit with a spp.reg trojan start page

| virus. My wife said there were 2 icons on the explorer

Re: spp.reg trojan start page virus

microsoft.public.security.virus: Re: spp.reg trojan start page virus

| toolbar– One said your computer is infected with spyware  
| and when she clicked on them to remove I guess we were  
| infected . I was not home at the time. Now internet  
| explorer doesn't respond also when I try to run spybot I  
| get the message error starting program a required .Dll file  
| msaniDll,was not found. I get the same message after a cold  
| reboot. Any help wold be deeply appriciated.
